The Morse Code (CW) class is being taught as introductory and refresher level to introduce students to the International Morse Code. It may also be used as a refresher course by those whose CW skills may be very rusty. The goal is to get students to the 5 word per minute range—or beyond.

The Farnsworth method is being employed. Each character is sent at a 12 wpm rate, but spaced apart to yield an overall rate of 5 wpm. The information will be presented in 7 lessons (8 classes).

The last day to register is the first day of class. We will collect money on the first day of class.
