The General Class license is the most exciting of the three ham radio licenses. It allows the ham to use voice communications on all the HF bands. These classes are geared towards students with limited electrical or electronic experience and who already have a Technician Class license. The ham classes will provide, at a slower pace (8 consecutive Saturdays), the instruction necessary to obtain the General Class ham license.

This course follows the ARRL License manual and it is structured to provide an understanding of the subject matter. Topics are taught at a slower pace, and presented in simpler terms to increase student comprehension.

Enroll by Jan 4, or by Dec 26 for a manual to be provided. Payment will be collected on Jan 4.
