Cost: Morse \$10
Tech \$15 for students 16 years and under
\$45 for adults includes Tech manual
\$25 if you provide your own manual
Class size limit – 20 students

The Technician Class is the first of three ham radio licenses and is the entry path into ham radio. Our classes are geared toward students with no electrical or electronic experience. These ham radio classes will provide the instructional and technical information necessary to obtain the Technician Class ham license. Classes are in person and conducted at a slower pace over 8 consecutive Saturdays. This Technician course follows the ARRL Technician License manual format and it is structured to provide an understanding of the subject matter.

The Morse Code (CW) is taught at a beginner's level, with a goal of the student achieving a 5-wpm speed at the end of the 8 weeks. Practical techniques for using the code are also taught.

An overview of the classes may be viewed at <https://sftarc.org/index.php/about-us-main-menu/ham-classes/class-registration>.

Paying the class fee and getting the Technician manual will be done at the first class. Alternatively, students may purchase their own manual from the ARRL or other sources.
